

Installation Guide: Stock & Profits Price Manager

Overview

The Stock & Profits Price Manager module enhances Magento 2 with powerful inventory control, profitability tracking, and dynamic pricing based on stock entries. This guide will walk you through installation and uninstallation procedures.

Installation via RAR

1. Unpack the module into the 'app/code/Vivlavoni/StockManager' directory.
2. Run the following Magento CLI commands:

```
bin/magento setup:upgrade
```

```
bin/magento cache:flush
```

Installation via Composer

1. Require the module using Composer:

```
composer require vivlavoni/module-product-stock-manager
```

2. Run the following Magento CLI commands:

```
bin/magento setup:upgrade
```

```
bin/magento cache:flush
```

Uninstallation via Composer

1. Remove the module using Composer:

```
composer remove vivlavoni/module-product-stock-manager
```

2. Run the following Magento CLI commands:

```
bin/magento setup:upgrade
```

```
bin/magento cache:flush
```

Uninstallation via File Removal

1. Remove the folder 'app/code/Vivlavoni/StockManager'.
2. Run the following Magento CLI commands:

bin/magento setup:upgrade

bin/magento cache:flush
